

CAPSULE SUMMARY SHEET

Survey No.: M:31-26

Construction Date: circa 1950

Name: Greater Washington Boy's and Girl's Club, Silver Spring Branch

Location: 1300 Forest Glen Road, Four Corners vicinity, Montgomery County

Private Ownership / Present Use: Educational, Park/ Occupied / Condition: Good / Restricted Access

Description:

The Greater Washington Boy's and Girl's Club, Silver Spring Branch is located on the south side of Forest Glen Road in the Four Corners vicinity of Montgomery County. The facility includes the Harry F. Duncan Building and an outdoor recreation area. The property was subdivided from the Argyle Country Club (later Sligo Golf Course) circa 1950 during a boom of residential development in the area that included the construction of the adjacent communities of Argyle Park, Argyle Club Estates, Sunset Terrace, and many others. Though constructed concurrently with adjacent subdivisions, the Boy's and Girl's Club property was not developed in conjunction with any one specific development, but rather was built to service the entire growing region.

The Greater Washington Boy's and Girl's Club, Silver Spring Branch includes one structure and a recreation area. The Harry F. Duncan Building is a 2-story brick structure constructed circa 1950. The building consists of two distinct parts: a gymnasium and a classroom wing. The gymnasium visually dominates the building with its large scale and barrel roof. To the east of the gymnasium is a 2-story classroom and administrative wing with a flat roof and band of windows. The structure is of brick and concrete construction with replacement vinyl windows and cast concrete detailing.

Significance:

The Greater Washington Boy's and Girl's Club, Silver Spring Branch was constructed circa 1950 in the Four Corners vicinity of Silver Spring. Four Corners was largely developed by the late 1950s. This rapidly developing area was a logical choice to locate a community facility such as a Boy's and Girl's Club. Located on land that was part of the Argyle Country Club, the Boy's and Girl's Club was accessible to numerous residential subdivisions. Due to the educational/recreational function of the Boy's and Girl's Club facility, the building's form closely resembles school architecture of the post World War II era. International style influences and building functions dictate the style of the structure, as evidenced by the large volume and barrel roof of the gymnasium, and the low horizontal massing of the classroom wing. The Greater Washington Boy's and Girl's Club, Silver Spring Branch is one of many recreational facilities in the Silver Spring area and Montgomery County. The building utilizes a typical form, and changes to the architectural fabric have altered the property's integrity. The Greater Washington Boy's and Girls' Club, Silver Spring Branch is not eligible for the National Register of Historic Places. This property is a common suburban resource type that does not have an association with early suburban development or a direct association with minority or labor groups. Many of the windows have been replaced and the characteristic barrel roof of the gymnasium has been covered with a dropped ceiling and climate control systems.

Resource Count: 1

Prepare both a summary paragraph and a general description of the resource and its various elements as it exists today.

The Greater Washington Boy's and Girl's Club, Silver Spring Branch is located on the south side of Forest Glen Road in the Four Corners vicinity of Montgomery County. The facility includes the Harry F. Duncan Building and an outdoor recreation area. The property was subdivided from the Argyle Country Club (later Sligo Golf Course) circa 1950 during a boom of residential development in the area that included the construction of the adjacent communities of Argyle Park, Argyle Club Estates, Sunset Terrace, and many others. Though constructed concurrently with adjacent subdivisions, the Boy's and Girl's Club property was not developed in conjunction with any one specific development, but rather was built to service the entire growing region.

The Greater Washington Boy's and Girl's Club, Silver Spring Branch includes one structure and a recreation area. The Harry F. Duncan Building is a 2-story brick structure constructed circa 1950. The building consists of two distinct parts: a gymnasium and a classroom wing. The gymnasium visually dominates the building with its large scale and barrel roof. To the east of the gymnasium is a 2-story classroom and administrative wing with a flat roof and band of windows. The structure is of brick and concrete construction with replacement vinyl windows and cast concrete detailing.

The main entrance to the building is on the east side of the building. The entrance, located near the northeast corner of the structure, is a 2-story glass window wall with a row of metal doors. The entrance is sheltered by a metal awning structure. On either side of the entrance are bands of windows framed by cast concrete. The bands of windows continued across the north and south elevations of the classroom wing and along the lower level of the gymnasium structure. The west elevation has metal doors leading from the gymnasium to the recreation area. Bands of metal awning windows are located along the upper level of the building.

Inside the main east entrance is a split level entry. Stairs to the second story lead to a vestibule, restrooms, and the gymnasium, while the steps to the lower level access a lobby, administrative offices, and classrooms. The interior floors are linolium, the walls are painted concrete block, and the ceilings are dropped with integral florescent lighting. The interior of the gymnasium has a wood floor, wood bleachers, concrete block walls, and bands of metal awning windows. The ceiling of the gym has been lowered to cover the original barrel ceiling, a principal feature of this building type. Lighting and ventilation systems have been added between the dropped and original ceilings.

Outside the gymnasium building is a swimming pool immediately south of the building and a ball field to the west. Concrete bleachers have been built into the hillside between the building and the ball field. The total acreage of the facility is 1.2 acres.

Prepare both a summary paragraph of significance and a general statement of history and support

The Greater Washington Boy's and Girl's Club, Silver Spring Branch was constructed circa 1950 in the Four Corners vicinity of Silver Spring. Four Corners began as a 19th-century agricultural community located at the crossroads on the Bladensburg and Colesville Roads. The community remained rural until the post-World War I building boom in suburban Montgomery County. Beginning in the late 1930s, Four Corners saw the development of Northwood Park, Woodmoor, Indian Spring Village, Indian Spring Terrace, North Hills of Sligo Park, and Fairway. These subdivisions expanded between 1945 and 1955 even as new ones, such as Northwood and Franklin Knolls, were constructed. The single-family house subdivisions that soon surrounded Four Corners had winding streets that formed an irregular grid in between major roads. Four Corners was largely developed by the late 1950s. This rapidly developing area was a logical choice to locate a community facility such as a Boy's and Girl's Club. Located on land that was part of the Argyle Country Club, the Boy's and Girl's Club was accessible to numerous residential subdivisions. Due to the educational/recreational function of the Boy's and Girl's Club facility, the building's form closely resembles school architecture of the post World War II era. International style influences and building functions dictate the style of the structure, as evidenced by the large volume and barrel roof of the gymnasium, and the low horizontal massing of the classroom wing. The Greater Washington Boy's and Girl's Club, Silver Spring Branch is one of many recreational facilities in the Silver Spring area and Montgomery County. The building utilizes a typical form, and changes to the architectural fabric have altered the property's integrity.

8. Significance (Continued)

National Register Evaluation:

The Greater Washington Boy's and Girl's Club, Silver Spring Branch, constructed circa 1950, is not eligible for the National Register of Historic Places. The property is not eligible under Criterion A, as research conducted indicates no association with any historic events or trends significant in the development of national, state or local history. This property is a common suburban resource type that does not have an association with early suburban development or a direct association with minority or labor groups. Historic research indicates that the property has no association with persons who have made specific contributions to history, and therefore, it does not meet Criterion B. It is not eligible under Criterion C, as it is a common building type that lacks material integrity. Many of the windows have been replaced and the characteristic barrel roof of the gymnasium has been covered with a dropped ceiling and climate control systems. Finally, investigations have not been conducted to determine whether the property has the potential to yield information important in history or pre-history, therefore, National Register Criterion D can not be assessed at this time.
